Security Clearance: Active

OBJECTIVE

Third-year Mechanical Engineering student with hands-on experience in manufacturing processes, digital engineering/digital twins, robotics, and 3D printing. Demonstrated leadership through guiding teams and completing engineering projects that improved workflows and delivered client-focused results. Skilled in applying engineering principles to enhance production efficiency, maintain quality standards, and support sustainable manufacturing practices. Seeking to leverage academic training, leadership skills, and practical experience to contribute to industrial operations and process optimization.

EDUCATION

Bachelor of Science in Mechanical Engineering

Bachelor of Science in Aerospace Engineering

University of Florida | Gainesville, FL

Awards: 2024 Dean's List

May 2027

GPA: 3.88/4.0

SKILLS

SolidWorks, STK (Systems Tool Kit), MagicDraw, Excel, Automotive Maintenance and Repair, AutoCAD, Blender, Proficient in computer assembly, Proficient in Welding, Proficient in 3D printing

RELEVANT EXPERIENCE

Development Support Intern

Jan 2025 – Present

NextGen Federal Systems

- Assisted in the development and analysis of digital twin models to support real-time simulation and decision-making processes for aerospace and defense systems.
- Created and executed STK (Systems Tool Kit) scenarios using Python scripting to simulate satellite constellations, mission operations, and orbital dynamics.
- Developed model-based systems engineering (MBSE) diagrams to represent system behavior, architecture, and decision logic in support of project planning and analysis.

Service Technician

May 2025 – Aug 2025

Jack Schmitt Chevrolet

- Diagnosed and repaired vehicle systems using OEM standards and engineering principles.
- Improved service efficiency through hands-on mechanical work in a fast-paced environment.

ADDITIONAL EXPERIENCE

- Utilized advanced 3D modeling and printing technologies to deliver high-quality, precision-engineered solutions, enhancing project management and prototyping skills.
- Modeled and fabricated mechanical assemblies for UF Solar Gators and personal design projects using SolidWorks and additive manufacturing.

LEADERSHIP AND INVOLVEMENT

Design and Manufacturing Lab Teaching Assistant

Jan 2026 – Present

- Instruct students on the safe operation of manual mills and lathes, bandsaws, MIG welding equipment, CNC machines, and sheet metal forming equipment through demonstrations, hands-on training, and project-based instruction.

Gator Motorsports

Aug 2023 – Present

- Contributed to chassis development with composite materials on UF's Formula SAE team, enhancing vehicle performance through innovative design and structural analysis.

Head of Electrical Development

March 2020 – May 2023

- Conducted and arranged training in safety, repair, and maintenance techniques, operational procedures and equipment use.
- Interpreted specifications, blueprints and orders to construct templates and laid out reference points for team members.
- Organized and led an FTC robotics camp, designing and delivering a comprehensive curriculum to introduce students to mechanical engineering principles and robotics, fostering a collaborative and innovative learning environment.

Senior Patrol Leader

Dec 2018 – Aug 2019

- Supervised and coordinated activities for a troop of 30+ scouts, ensuring safety, engagement, and accountability during projects and outings.

Additional Involvement: Florida Gator Band, Florida Engineering Society, American Society of Mech. Engineers, Gator TPED

RELATED PROJECTS

Eagle Scout Project

Jul 2019 – Aug 2019

Central Christian Church – Troop 85

- Led site prep and installation of concrete pavers, coordinating team workflow and materials
- Managed all aspects of the project, including material selection and layout, demonstrating strong project management and hands-on engineering skills.
